EDUCATION

Master Degree - Expected grade: 110/110 | ***Software Engineering & IT Management*** — Oct. 2023 – Mar. 2026
Supervisor: Dario Di Nucci - Thesis: Perfomance Regression Testing Optimization — University of Salerno

- Main focus on Software Maintenance, Evolution, Quality, Management aspects
- Gained fundamental knowledge on Information Security, Artificial Intelligence

Bachelor Degree - Final grade: 103/110 | ***Computer Science*** — Sept. 2020 – Sept. 2023
Supervisor: Carmine Gravino - Thesis: Bloated Dependencies Detection in Python — University of Salerno

- Main focus on Programming, Algorithms and Data Structures, Databases aspects
- Gained fundamental knowledge on Computer Architecture, Computer Networking

PROJECTS

Data Smell Detection + | **Maintenance and Evolution (Django, SeleniumIDE)** — Project Page
A simulation of a maintenance activity for a tool that finds data smells on a .csv dataset

- Conducted an Impact Analysis on the identified change requests
- Redocumented the core parts of the system for the maintenance
- Defined tests for the new features and executed regression testing

Archivehicle | **Data Engineering (Pandas, MongoDB, Flask)** — Project Page
A data engineering process for the information management of a vehicle park of a car dealer

- Searched and collected a specific dataset from Kaggle to simulate the vehicle park
- Completed a data cleaning process in order to remove incomplete and unneeded data
- Stored all the cleaned and generated datasets in a No-SQL MongoDB with Compass UI

Commons-net Dependability | **Quality Assurance (Java SE, OWASP Tools)** — Project Page
A dependability report for an open source library of Apache Commons project

- Fixed some of the bugs and code smells detected by the Sonarcloud analysis
- Generated some new test cases to try to improve the computed test coverage
- Executed a vulnerability scan with FindSecBugs and Dependency-Check tools

SmartGym | **Greenfield Engineering (Java Android SDK, JUnit, Espresso)** — Project Page
A prototype of an android mobile app where you can choose some body weight exercises

- Analyzed the main app requirements with UML Diagrams and Use Cases definement
- Designed the High and Low Level parts of the system, including also a testing phase
- Realized a Genetic Algorithm that suggests an exercise sheet to the user by his features

TECHNICAL SKILLS

Programming Languages: **Java** (SE, EE, Android SDK), **Python** (Django, Flask), C, Javascript
Query Languages and Databases: **SQL**, Firebase, MongoDB
Build Automation Systems: **Maven**, Gradle
Operating Systems: **Linux**, Android, Windows
Software Testing: **Junit, JaCoCo, JMH**, Espresso, Pytest, SeleniumIDE
Containers and Virtualization: **Docker**, Virtualbox

LANGUAGES

Italian - Native Language
English - B2 Intermediate

SOFT SKILLS

Organizational and management

I contributed in the projects also with my **leadership**. I took care of **planning and managing** the project activities and completing my tasks in an **autonomous** and detailed way, encouraging the **teamwork** when it was necessary to achieve the goal and solve the issue.

Communication and interpersonal

I prefer to set the communication in a **concise** way, trying to **be friendly** and let the colleagues feel safer and less stressed when they are interacting with me. I am ready to **show initiative** for any type of help that could fall under my abilities and under my knowledge.

I authorize the processing of personal data present in the CV according to the General data protection regulation 679/2016.

Capaccio-Paestum, 2026-03-03
