EXPERIENCE

DevOps Engineer Apr. 2026 - Ongoing
ReeVo Remote
- Contributed to a Java/Groovy codebase of a Jenkins shared library for enabling custom YAML pipelines
- Conducted a Software Testing campaign leveraging Data Driven and Interaction Based techniques
- Integrated Ansible playbooks for deploying webapplications running on Apache Tomcat Web Server
- Supported the migration process of an application from On-Premise Servers to Google Cloud VMs
- Explored the adoption of modern cloud-agnostic Kubernetes-native CI/CD platforms such as Konflux

Master Internship Jul. 2025 - Feb. 2026
SeSa Lab Remote
- Generated new test cases with Prompt Engineering and Ablation techniques
- Implemented custom Listeners to intercept coverage during tests execution
- Created custom coverage reports for each single test case through JaCoCo API
- Scripted the data transformation of coverage reports to JSON with Python
- Tuned optimization algorithms to retrieve a subset of the starting test suite

PROJECTS

Data Smell Detection + | **Maintenance and Evolution (Django, SeleniumIDE)** Project Page
A simulation of a maintenance activity for a tool that finds data smells on a .csv dataset
- Conducted an Impact Analysis on the identified change requests
- Redocumented the core parts of the system for the maintenance
- Defined tests for the new features and executed regression testing

Archivehicle | **Data Engineering (Pandas, MongoDB, Flask)** Project Page
A data engineering process for the information management of a vehicle park of a car dealer
- Searched and collected a specific dataset from Kaggle to simulate the vehicle park
- Completed a data cleaning process in order to remove incomplete and unneeded data
- Stored all the cleaned and generated datasets in a No-SQL MongoDB with Compass UI

Commons-net Dependability | **Quality Assurance (Java SE, OWASP Tools)** Project Page
A dependability report for an open source library of Apache Commons project
- Fixed some of the bugs and code smells detected by the Sonarcloud analysis
- Generated some new test cases to try to improve the computed test coverage
- Executed a vulnerability scan with FindSecBugs and Dependency-Check tools

SmartGym | **Greenfield Engineering (Java Android SDK, JUnit, Espresso)** Project Page
A prototype of an android mobile app where you can choose some body weight exercises
- Analyzed the main app requirements with UML Diagrams and Use Cases definement
- Designed the High and Low Level parts of the system, including also a testing phase
- Realized a Genetic Algorithm that suggests an exercise sheet to the user by his features

TECHNICAL SKILLS

Programming Languages: **Java** (SE, EE, Android SDK), **Python** (Django, Pandas, Flask), Groovy, C, Javascript
Query Languages and Databases: **SQL**, Firebase, MongoDB
Automation Tools: **Maven**, Gradle, Ansible, Jenkins
Operating Systems: **Linux**, Android, Windows
Software Testing: **Junit**, **JaCoCo**, **JMH**, Espresso, SeleniumIDE
Containers and Virtualization: Docker, Virtualbox

LANGUAGES

Italian (Native Speaker), **English** (B2 Intermediate)

EDUCATION

Master Degree - Final Grade: 110L/110 | ***Computer Science - Software Engineering*** Oct. 2023 – Mar. 2026
Supervisor: Dario Di Nucci - Thesis: Perfomance Regression Testing Optimization University of Salerno

Bachelor Degree - Final grade: 103/110 | ***Computer Science*** Sept. 2020 – Sept. 2023
Supervisor: Carmine Gravino - Thesis: Bloated Dependencies Detection in Python University of Salerno

I authorize the processing of personal data present in the CV according to the General data protection regulation 679/2016.
Capaccio-Paestum, 2026-10-28
